

ASIIMIRE PRAISE

Full-Stack Developer | Software Developer | React, Node.js & TypeScript

Kampala, Uganda | +256 773 608 073 | praiseasiimire11@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Full-Stack Software Developer with hands-on experience building web, mobile, and backend applications using JavaScript, TypeScript, React, React Native, Node.js, NestJS, REST APIs, PostgreSQL, MongoDB, Git, GitHub, Docker, Swagger/OpenAPI, and cloud deployment workflows. Strong interest in building clean user interfaces, reliable APIs, data-driven features, and practical software products that solve real user problems.

Fast learner with experience contributing to real-world projects, working in agile teams, debugging, documenting APIs, and continuously improving software quality.

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, React, HTML, CSS, responsive UI development, component-based interfaces
Backend	Node.js, NestJS, REST APIs, API integration, authentication concepts, backend debugging
Databases	PostgreSQL, MongoDB, SQL basics, database-driven features, data modeling fundamentals
Mobile	React Native, mobile UI development, JSON, API consumption, debugging, performance awareness
Tools & Deployment	Git, GitHub, Docker, Swagger/OpenAPI, DigitalOcean, Vercel, Railway, Render, CI/CD concepts, Agile teamwork
Additional	Python fundamentals, technical documentation, problem-solving, product thinking, code review participation

SOFTWARE EXPERIENCE

Software Engineering Apprentice | Refactory Academy | 2025 - 2026

- Built and contributed to real-world software applications across frontend, backend, and mobile development.
- Developed backend APIs and application features using Node.js, TypeScript, and NestJS, with database-driven logic and RESTful API workflows.
- Built React web interfaces and React Native mobile screens, integrating frontend features with backend services and data flows.
- Collaborated in agile teams through sprint planning, stand-ups, code reviews, Git workflows, debugging, testing, and project reviews.
- Applied clean code practices, technical documentation, problem-solving, and continuous learning across full-stack development tasks.

PROJECTS

Unified Sports Corporate Platform | Full-Stack Web & Mobile Application

Project link: <https://beyondsports.fitness/>

An automated digital platform designed to solve fragmented fitness data challenges while fostering health, accountability, and team spirit within corporate organizations. The platform supports group accountability, corporate challenges, GPS activity tracking, and professional coaching oversight.

- Contributed to web and mobile features supporting corporate sports participation, activity tracking, coaching oversight, and team-based fitness engagement.
- Worked with React Native for mobile features and React for web interfaces, supporting responsive and user-friendly experiences across devices.
- Integrated backend services and APIs built with NestJS, including API documentation and testing support through Swagger/OpenAPI.
- Supported PostgreSQL-backed features, Git/GitHub collaboration, Docker-based workflows, and DigitalOcean deployment practices.

Technologies Used: React Native, React, NestJS, TypeScript, JavaScript, PostgreSQL, Swagger/OpenAPI, Git, GitHub, Docker, DigitalOcean.

Weather-AI Dashboard | API Integration Project

Project link: <https://weather-ai-dashboard-eosin.vercel.app/>

Built a weather dashboard that integrates the Weather-AI API to present current conditions, short-term weather updates, and a weekly forecast in a clean, responsive interface.

- Consumed external weather API data and displayed it through reusable, user-friendly UI components.
- Implemented a responsive dashboard experience with loading, error, and data display states.
- Prepared a public GitHub repository with a clean README and deployed the application online for review.

Technologies Used: Next.js, TypeScript, API integration, responsive UI development, Git, GitHub, Vercel.

Mayondo Wood & Furniture Ltd - Business Management System | Full-Stack Software Engineering Project

Project link: <https://project-io98.vercel.app/>

Developed a business management system for a B2B wood and furniture company to streamline inventory, sales, customer records, supplier records, delivery charges, stock updates, and management reporting.

- Built inventory and sales features for product records, stock quantities, customer details, sales agents, payment methods, and receipts.
- Implemented business logic for automatic delivery charge calculation, stock updates, and sales/inventory reporting.
- Used database-driven development, Git version control, debugging, and agile teamwork to deliver practical business functionality.

Technologies Used: JavaScript, React, Node.js, MongoDB, HTML, CSS, Git, GitHub, Vercel.

EDUCATION

Advanced Certificate in Software Engineering | Refactory Academy | 2025 - 2026

Practical training in full-stack software development, JavaScript, TypeScript, React, Node.js, databases, Git, agile teamwork, debugging, testing, and deployment workflows.

Certificate in Software Engineering | Refactory Academy | 2025

Uganda Advanced Certificate of Education | St. Matia Mulumba Secondary School | 2024

CERTIFICATIONS

- Software Engineering - Refactory Academy
- Introduction to Microsoft Azure: Describe cloud concepts - Microsoft Learn | September 2025
- Soft Skills - BrighterMonday Uganda

LANGUAGES

English - Very Fluent | Runyankole - Very Fluent | Luganda - Fluent
